

PharmaClik POS ONE Training Overview

Transferring
Knowledge into Action

The key to success with your new PharmaClik POS ONE software is how well you utilize it to run your business. Learning how to use the software is a critical first step.

Included with your purchase of POS ONE are two key learning components:

1. A comprehensive self-directed learning program. This program includes training booklets that are separated out to help you learn key concepts and ‘how to’ tasks. These books contain:
 - Context and best practices for the different tasks.
 - Activities that walk you through performing the steps to learn the tasks.
 - Knowledge checks to validate you understand what you just learned.

Don’t skip this learning. You wouldn’t get behind the wheel of a car without learning to drive it!

2. A two-hour phone session with an experienced PharmaClik POS training specialist **AFTER** you complete the self-directed learning program. This session includes:
 - A guided tour of the PTS portal
 - Confirming that the system is set up correctly
 - Adding non-McKesson products (pop, chips)
 - Creating shelf labels
 - Customizing discounts (staff, seniors, doctors)
 - Answering questions you may have from the self-directed learning program

Optional Training Available

To enhance your new knowledge of PharmaClik POS ONE, additional phone training is available one month after your Go Live day.

	<p>Advanced POS ONE and Q&A - Two Hour Phone Session - \$199</p> <ul style="list-style-type: none"> • Analyze your store sales data • Create instore promotions • Consultation on inventory set-up • Best practices for receiving inventory • Discuss any questions or concerns since go live day
